

**\_RALLYMETER | blackBox pulse & blackBox buttons only**  
<https://www.rallymeter.com/shop/>

## ENG

Rallymeter now allows 2 external pushbuttons to be used inside the app. You need a *blackBox pulse* or a *blackBox buttons only* to use it.

Inside the app you can use button #1 for:

- Add meters while in main screen
- Press OK on pop ups like adjustment on references, end of stage...

And you can customise use for button #2:

- Press CANCEL popups like adjustment on references
- And one of the choice:
  - SUBTRACT distance
  - RESET partial odometer
  - Temporary FREEZE distance

For users with older blackBox, there are 2 options:

1. Reprogramming and push buttons cable fit for a marginal cost of 20€ + shipping.
2. Buy the new blackBox with a 50% discount (only for old blackBox owners)
